

## **Oracle WebCenter Interaction Administration (2 Days)**

This course provides a comprehensive overview of all the most commonly used aspects of Oracle WebCenter Interaction 10Gr3. Students will learn how to install, configure and administer the portal. It is also for the person wanting to understand how to conduct a portal installation, configuration and maintenance project. In two days you will implement a portal that can be used as a departmental solution. All aspects of Oracle WCI are reviewed including MyPages, Automation Servers, Search, Web Services, Portlets, Communities, Experience Definitions, the Knowledge Directory, and best practices for maintenance and troubleshooting to keep the portal up and running smoothly.

### **Prerequisites**
